## 4.2.1

### Library is automated using Integrated Library Management System (ILMS).

- *Name of the ILMS software: **AutoLib Library Management System***
- *Nature of automation (fully or partially): **Fully***
- *Version: **New Generation (NG)***
- *Year of automation: **2009 upgraded in 2016 & 2018***
- *AMC: **2023***

### Description of Library Automation

We are using AutoLib library management software since 2009. It is upgraded two times respectively in 2016 and 2018. This ILMS is very user friendly and it enables efficient library administration to cater user services. AutoLib software keeps all the transaction records & generates various reports which are very useful for library administration. ILMS is having various modules like **Master, Member, Acquisition, Circulation, Tools, Search, Reports, Print, System Admin, Help** etc.

**Web OPAC:**
Library information search on the Internet / Intranet. This module allows the user to login as a library member and view his/her circulation history, borrowed items and reservations. User can even reserve an item in the library through the Internet. Along with all these features, catalogue browsing, circulation details etc.

**Transactional SMS:** Through the ILMS transactional SMS facility is provided to user to confirmation of their circulation details.

AutoLib is an Integrated Library Management Software encompassing all aspects of library management.
